

## WHITE PEARL GYPSUM -POP

White Pearl Gypsum Powder is specially formulated with high-quality raw materials. It is the best base material for assembling various interior and exterior works as single coat for walls and ceilings, also used in moulds for making decorative forms, can be used in other fabrication works such as electrical or plumbing.

White Pearl Gypsum Powder are available in three different Names. Such as White Gypsum, Super White and Ultra White. These micronized powder brightness, whiteness and strength making us one of the best supplier of gypsum powder in India. At White Pearl Gypsum, we believe in quality products and a sustainable business relationship with our clients. We are committed to providing the best materials which will help to reshape the future of construction industry.

### Applications:-

Gypsum powder is a sulfate mineral which is made from calcium sulfate dihydrate. It is also known as POP (plaster of Paris), that is a calcined gypsum, which is mixed with water and after sometime it become hard structure used in casting and construction. It is found in nature as selenite flattened bed with crystal form shape. The pure gypsum is white in color and often found with the mineral halite and sulfur. These are also considered as best crystal habit, flexible crystal, cleavage and hard solid mass.

### Uses:

- Manufacturing gypsum panel or building plasters
- Used in manufacturing cement
- Used as fertilizer
- As a color additive
- For clay and ceiling tiles
- As grout of marbles
- Gypsum mould and statues
- Additives to other products
